Conclusion

Essay

In today's world, many people know about some famous personalities for their great invention in the world, such as Elon Musk, Bill Gates and Mark Zuckerberg. All of them bring great advancement in a world by their invention, but all of these males are not able to progress in their field, without the invention of programming language in computer science. Ada Lovelace, an English mathematician and writer, is often referred to as "the first programmer" or also the "Mother of Computer" because she helped revolutionize the trajectory of the computer industry. Ada Lovelace's hardwork and deep knowledge in series of mathematics changes the world. She ~~is~~ was well educated girl, who invent language, when she ~~is~~ was only 17 years old. Without her knowledge and capability world would not progress as it today. But, in today's world due to lack of proper knowledge to women, they are not able to progress in world and to show their potential and capabilities to the world. To bring women empowerment many countries or organizations starts campaign and

makes some strategies, however ^{this problem still exist} due to lack of resources and ~~uneff~~ efficient strategies and policies. Education for women not only brings women empowerment, but it also helpful in eradicating typical patriarchal system from society and it also brings prosperity in the country or society. (221)
