The Essay

Today many Peoples are getting married later than before. Some wait because they want to study, work or enjoy their freedom first. It brings serious consequences such as reduced fertility, psychological stress and shifts in family structures. Understanding the causes and effects of this shift is essential for analyzing its impacts on individuals and society. Marriage has long been considered a key part of adult life, especially in traditional societies where it is closely linked with family, social stability

and cultural values. In the past people married at a younger age often soon after completing basic education. However, in recent years, there has been a noticeable shift in this trend. Many individuals now delay marriage due to changing life styles, increased focus on education and careers. This growing pattern of late marriages is not only a personal choice but also a social issue, as it brings both positive and negative effects on individuals, families and society as a whole. "Delayed marriages" often driven by Education, Job and careers, Money Problems and modern thinking result in significant personal
