Marriage, a cornerstone of social structure and familial continuity, has traditionally occurred ~~thoroughtly~~ during early adulthood. However, in recent decades, there seems to be a shift in this milestone; Individuals around the globe are now shifting towards late marriages. However, there is no single reason for ~~the~~ cause of delayed marriages, there are plethora of reasons why the individual is choosing to delay his or her marriage. Significantly, this trend is linked to various factors which include rising educational and career pursuits, economic instability, fear of commitments, changing gender roles and familial expectations. Although it provides autonomy and freedom, it is riddled with various complex challenges, especially for women.

Delayed marriages bring several challenges such as social demographic and psychological challenges, several issues can arise such as emotional isolation, reduced fertility rates and higher divorce rates. There is a growing need to understand both of the aspects of delayed marriages, its benefits and consequences in order to draw a fine line.
