Essay Climate change

It is fine ... You quote the fact and need. To mention the source of that fact (Fact 1)

~~Statistics~~ → As the world Economic Forum's Global Risks Report 2025 starkly outlines, extreme weather events have solidified their place among the top global-risk for the fourth consecutive year.

Fact (2)

A report recently released by World Meteorological Organizations shows that temperatures are expected to continue at or near record levels in the next five years, increasing climate risks and impacts on societies, economies and sustainable development.

Statistics (WMO)

The report forecasts that the annually averaged global mean near surface temperature for each year between 2025 and 2029 is predicted to be between 1.2°C and 1.9°C

DATE: _____

DAY: _____

higher than the average over the years 1850-1900.

Statistics 2 (WMO)

There is an 80% chance that at least one year between 2025 and 2029 will be warmer than the warmest year on record (currently 2024).

Statistics 3

There is an 86% chance that at least one year will be more than 1.5°C above the pre-industrial level.

Statistic 4

Warming in the Arctic is expected to continue to dramatically outpace the rest of the world, with warming of more than 3.5 times of global average during the polar winter.

Consequences of rising global Temp.

- (1) Sea level rise.
- (2) Droughts and heat waves.
- (3) Biodiversity loss.
- (4) Affect cyclones.

Why climate adaptation must be accelerated?

- (1) Food Security
- (2) Urban Resilience.
- (3) Public health.

What should Pak Do?

- (1) Need to adopt mitigation strategies
- (2) Using Energy-efficient sources.
- (3) Government needs to impose taxes
- (4) National adaptation plans.
- (5) Plantation.
Promote organic food and crops.
