# Benefits of online learning

In the ~~beginning~~ of 2020's, Pandemic ~~situation~~

u can take more interesting start by writing like in the beggining of second dacade of 21st century

(Covid -19) slowed down and almost stopped the working of multiple industries, business, organization of institutes and education activities. School, college and universities going students starts forgetting not only their subjects, but also their disciplined and routine life. The only thing that is not only the solution of this problem, but also the best solution of this problem is online learning. Many school, colleges and universities students continue their learning process through online education system. However, online learning is not only beneficial for pandemic situation, but it also beneficial in other ways. First of all, it is less expensive as compared to classroom learning. Because, online learning requires a good network, on the other hand, attending classes in universities, colleges and schools requires transportation system which is very proper uniform, maximum fees because of A/C, <sup>library</sup> and security charges, which is very costly as compared to the online learning. Secondly, individual can learn and teach anywhere all around the world, there is no need to or requirement to teach or learn while sitting or living in a specific city or country. Thirdly, individual who wants to study, but not studying because of his disability and busy schedule can also follow their dream of learning through online learning system, which is easy,

simple and user friendly. Fourthly, an individual can save a huge amount of his money, while learning or teaching online. Because, during learning or teaching online there is no need of transportation and to waste money on transportation and on proper dressing. Fifthly, many females and women struggles to continue their studies, but due to some reasons such as family issues, expensive studies, living in backward area, where is no proper institute for female learning, busy marriage life and typical patriarchal system, their not able to fulfill their dreams. But because of learning it is possible for them to continue their studies and fulfill their dreams. Sixthly, many students or individuals do feels distracted or <sup>distracted</sup> distracted during classroom learning because of the boisterous of other classmates, which led them effects on their retention ability and reduces their focus from the teacher, who is giving lecture. But because of online learning many students can easily focus on their learning and easily understand the lecture given by a teacher. Seventhly, for online learning there is no need of proper infrastructure of class or institute. Lastly, by online learning individuals whether they are male or female can learn anything which is not possible to learn from

their surroundings, due to many reasons such as it might be a new skill, which <sup>it</sup> does not have proper institute to learn or might be because that individual live in backward area, where there is no proper institute or might be because it is ~~online~~ expensive. But because of online learning they can learn anything, which is new or less expensive. So, in the end, online learning system is very beneficial not only in Pandemic situation but in each and every situation. (499)
