5- conclusion

"There are decades where nothing happens; and there are weeks where decades happen." This quote of Vladimir Lenin aptly reflects the ongoing Israel genocide in Gaza after Hamas' illegal post-7 October attack. What followed after post-7 October attack has left humanity in shambles. Israeli forces' rampage in Gaza has displaced millions, killed thousands and have left Gaza in ruins. Yet the world is watching silently, as what is unfolding near its eye. Though the genesis of the conflict dates back to illegal Israel creation under Balfour declaration. A state created within a Palestinian state by allied forces with an objective to strategically control oil rich countries. But that state, now Israel, has morphed itself into a state envisioned by Hitler. Today Israel follows the same policies which Hitler followed for Jews in Germany that is

starving, killing, ~~hazani~~ indiscriminately
attacking civilians and children. Moreover,
evident by its attack on Iran
and Syria recently. Though the
world leaders are haplessly ^{tactless} watching
the sand is shifting. People around
of Israel are becoming hostile
China's policy toward Gaza
becoming assertive of Israel. Likewise,
Israel's closest allies United States
(US), United Kingdom (UK) and France
are calling for Israel to stop
this genocide. Israel is losing the
global narrative as world is
becoming conscious of what is
unfolding in Gaza. Israel within
and from outside is becoming
hollow and chances of it collapsing
like house of cards ~~is~~ becoming
more pertinent than ever. In these
events, the world must hold Israeli
leaders and army ~~to~~ accountable for
the genocide they conducted. As without
taking such steps the future of
middle east will tread to another
genocide.
