

Education Crisis in Pakistan, Causes, Consequences and Reform

1. Introduction

a. Hook

Pakistan's education system faces significant challenges that contribute to a national crisis.

b. Background

Pakistan's education system is divided into primary, secondary and tertiary levels with public, private and madrasa based institutions.

Approximately 22.8 million children aged 5-16 are out of school, according to UNFESCO data from 2021. The system struggles with disparities in access, quality and outcomes across urban and rural areas.

c. Thesis Statement

The education crisis is defined by widespread illiteracy, inequitable access and poor educational outcomes. Case in point; only 59% adults in Pakistan are illiterate (Pakistan Economic Survey, 2022-23) for below regional averages. Example: Rural areas, particularly in Balochistan and KP have significantly lower enrolment rates compared to urban centres like Lahore or Karachi.

2. Causes of Education Crisis in Pakistan

a. Poverty and Economic constraints limits access to education for millions of Pakistani children
Case in point:- Over 24% of Pakistan's population

②

~~lives below the poverty line (World Bank: 2023)~~
~~forcing families to prioritize child labour~~
~~over schooling. For instance, in rural~~
~~Sindh, children often work in agriculture~~
~~instead of attending schools.~~

~~Example:- High costs of uniforms, books~~
~~leads to deter enrollment, especially for low~~
~~income households.~~

b. Inadequate Infrastructure and resources hinder effective education delivery

~~case in point:- According to Pakistan Education statistics report (2021-2022), 35% of Public schools lack basic facilities like clean water and 20% have no electricity.~~

~~Example:- In Baluchistan ghost schools, non-functional institutions listed on paper have been reported, wasting resources and leaving communities without education option.~~

c. Cultural and social barriers deepen educational disparities

~~case in point:- Only 48% of girls are enrolled in primary school (UNICEF-2022)~~

~~Example:- Early marriages in KP halt girls' education.~~

d. Political instability and inconsistent policies disrupt progress.

~~case in point:- Teachers absenteeism in Sindh undermine reform.~~

~~Example:- Shifting policies, like the SNC, face delay.~~

e. Low government funding hampers educational development.

Case in point:- Pakistan spends 2.3% of GDP on education (2022-23) and 0.8% of GDP as of economic survey of Pakistan and fiscal year budget (2024-25), below UNESCO's 4%.

3. Consequences:-

a. High illiteracy and skill gaps: weaken the workforce

Case in point:- 59% Literacy rate (2022) limits I.T and manufacturing skills.

Example:- Only 1% youth are in vocational training.

b. Poverty and unemployment rise due to poor education.

Case in point:- 60% of unemployed youth lack basic education (ILO, 2023)

Example:- Karachi's slum youth rely on low skill jobs.

c. Social and gender disparities are worsened by limited education.

Case in point:- Women make up 25% of the labour force (World Bank, 2023)

Example:- Few girls' schools in Baluchistan reinforce inequality.

d. National Development is stymied by an uneducated population

Case in point:- Pakistan ranks 161 on human development Index (UNDP, 2022)

Example:- Low tech exports reflect a lack of skilled professionals.

e. Lack of education contributes to extremism and social unrest.

Case in point:- Madarassas with un-checked curricular can promote radicalization.

④

these are quite relevant
and well organized and quite relevant

4. Reform to improve the Education System of Pakistan

well structured phrases

a. Increased government investment can strengthen education

case in point:- Bangladesh's 3.5% of GDP spending raised literacy.

Example:- 4% of GDP spending could find new schools.

b. Public-Private partnerships can enhance infrastructure

case in point:- The citizens foundation built 1800 new schools for 28,000 students in Sindh.

Example:- Punjab's partnerships upgraded 5000 schools.

c. Teacher training and curriculum development improve quality.

case in point:- Sindh's USAID training boosted math scores by 15%.

Example:- 60% of teachers lack modern training (Aga Khan University - 2002)

d. Community engagement programs can sustain educational progress

case in point:- village education committee in Gilgit-Baltistan increased enrollment by 8%.

Example:- Panjab's (Parho Panjab) promotes girls' schooling.

Conclusion
