Once upon a time, a farmer gave few savings to his two sons. One of his son invests in his books a tried to obtain knowledge and the other invests in ~~agriculture~~, after few years the elder son has got a mathless achievements in his life while the youngest sons remained in the same condition as before. The elder son gets success because of his investment in the knowledge sectors. Investment in knowledge sectors has brought economic prosperity, enchances the growth rate of country in various developement sector, and provision a strong defense to a country and produces the bright future of the country, helpful in the edimination of the social evils in society. "Investment is a tool of progress in all fields including knowledge. But the investment in knowledge saves the interests of a nation in a better way due to its influence over other aspects of life. So, the investment in knowledge along with the other aspects of life bring prosperity in a society". Investment in other sectors also saves the interests of society like economic sectors.

Write thesis statement atleast in the introduction

investment and the investment in obtaining resources, defense system of a country, food and other social sectors and the provisions of basic needs saves the interests. Despite of all have the knowledge investment has great influence in savings interest due to its influence over the other fields like in economic, defense, the fulfillment of the other's basic needs and the edimination of crime in society.

However, the investment in knowledges sector's pays best interest. The knowledge has great influence over the other sectors of life. Knowledge remains Obligation of all religions. Islam also declare it as an obligation. All the things of the world can be stoled. No one can saved them from the cruelty of time as well. They will vanish after certain period but knowledge is a unique treasure in the world, no one dare to steal it from the others. It will also refined after the certain period of time. There are very great scholars in the world are still alive. because of their work i.e knowledge like

Avicenna, Al-Bairooni and Ibn-ul-Hasham. etc. So, the investment in knowledge makes you alive even after the long era of time.

Knowledge is a unique treasure of the world. There are the various evidences which shows that the investment in knowledge is better than the investment in anything other aspects in the world.

The first one is that it shows the right and strategic ways how to earn money. The knowledge teaches them the better source of the earning of money.

For example, if a person is an illiterate he does not aware about the different sources of money excepts tradition and some prefer to beg from others while on the other hand of person who has knowledge. he prefer to earn money with his own hands through various modern digital skills and sources.

So, the knowledge teaches us how to ~~complete~~ ^{deal} the economic problems of a society.

The knowledge does not only make a capable man but it also proves good for the defense.

of the country. It enables a man to protect his country from external and internal threats. The modern era is based on tech-war. Every country tries to attack on their opponent country through the technology. In the recent attack of Israel over Iran shows that Israel hacked the system of Iran. He does cyber and physical attack over Iran. If the country has the strong power of knowledge about AI then he will be able to secure it through a comprehensive way. So, the knowledge proves helpful in the defense system of a country.

Hence, the knowledge does not only helpful in resolving the issues of defense and economic aspects but it also proves helpful in the future of the country. The future of the country, become glorious if the know. nation invests in knowledge. The investment in knowledge provides the literate, sensible generation which will transmit the knowledge to the next generation. This generation will explore the new knowledge and fores to research over the entire knowledge

The nation has its own scientists, engineers and industrialists and medical experts as well. The China invests in the knowledge therefore it includes it into world top global economy's. In this way the nation can bright their future through the investment in knowledge.

The most crucial impact of the country's investment in knowledge over the development of a country. The country's interest in the investment in knowledge will bring prosperity in all the fields of life. The economists knows how to deal with the problem of a country. The medical experts can find the new ways of treatment for their existing disease. The nation deals how to deal and take advantage with the existing problems of the resources. Therefore there is no need of imports but it will increase exports. In this way, the investment in knowledge will increase the chances of development of a country.

Investment in knowledge also brings prosperity and secures the peace of society. As the social evils and crime rates are increasing day by day in society. The elimination of the crime can be possible through the investment in

in knowledge. As **Robert Merton** finds that the poor and underdeveloped areas are becoming the victim of social crime. He called it as a concentric zone of the city. When the people have knowledge about the social evil's outcomes and also have knowledge how to deal with the problem of society. In this way, the social crime can be eliminated through the investment in knowledge.

The other sector also requires the investment which are crucial part of society. They also brings prosperity in society. Investment in knowledge provides the way of the earning it only shows path but does not create opportunities for the people. Investment in economic sector can bring the sources of employment for the people. The investment in economic sectors brings the prosperity for the public according to **social control theory**, when the people does not get the positive means of earning they will find the negative means for earning. In this way. the economic sector will prove helpful in creating the prosperity in society.

Defense system does not fulfill its requirements for the protection of country through the investment in knowledge. The defense system also depends on arms. Those nations who possess the modern equipments of arms are considered to be the strong nation. As America and Russia and France have the latest modern equipment of arms, therefore they are considered the greatest nation of the world. If the Palestine^{land} has nuclear power then does Israel dare to attack on Palestine. Although knowledge is essential yet the investment in arms also plays as a deterrent role for the defense of the country.

Investment in other social sectors like health, provision of basic needs like clean water, saving environments also saves the interests of the country rather than investment only in knowledge. The investment in social sector welfare sectors saves the lives of the people. As the famous poet Ahmed Nadeem Qasmi wrote in his poem "The Feed" that the ruler should invest in the food rather than nukes. As the people are hungry, so, these ~~are~~ sectors requires investments for the saving interest of a nation.

Investment in knowledge enhances the development of a country but the country should not rely only on knowledge. The knowledge also requires resources for the doing tasks. The resources requires investment. For example if a person has the knowledge of earning profits through textile sectors. He has to buy the machinery and hired labour which has great skill. All these things needs investment. Then, the person will be able to safe his interest in a better way. Therefore, the investment in finding resources also save the interests

Although, the knowledge guides us that we should avoid ourselves from crime. The knowledge cannot feed the stomach of an individual. The basic need of an individual is to earn bread and butter. In this way he can lead a little bit comfortable life. The books are not sufficient. The investment in creating the opportunity of earning bread and butter can save the interests of a country in a better way. The 1 census 2023 shows that most of the population of Pakistan.

is consisted on the young people. They
It is considered as a kind of good and
prosperous form of demographic model
but unfortunately, the most young are
illiterate. but they do not have proper
jobs. They are unemployed. Therefore,
They involve in social crime for
fulfilling their basic needs. When the
people do not get their needs through
positive means they tend towards the
negative means for fulfilling their goals.
So, the eradication of crime can only
be possible if the country invests
in creating the sources of jobs for an
individual.

It is the fact that the
investment in other sectors also secure the
future of an individual or a country but
this investment has only one covered the
one aspects. Its span of time is very
short. The investment in knowledge can
cover does not only social sectors but
it also covers the economic, defense and
the development of an individual as
well as the country. Knowledge teaches
the means of earning although it
requires the resources investment but
can also be handled through the
help of knowledge. The knowledge

guides us that how we can get the profits through various means. It teaches us the strategies for the investment in economic sector. The econo. If an individual has the money and he does not know how to invest in a profitable way then his business will collapse day by day. For example USA invests the money in economic sector through a comprehensive way. They invests in food industry in Agricultural areas. Through the help of knowledge they produce grains which has the good quality for the production. In this way the USA's economy gets strength. Hence, the economic sectors also requires knowledge for progress.

In this Artificial intelligence's era, the defense system does not rely only on weapon. This is the advanced era. Firstly, people fight through sword, the guns and nukes takes the place of sword now the artificial intelligence is going to take the place of a nukes. The people are now attacking the other people through cyber attacks. The important information of

country can be hacked. the individual can become easily the victim of breaching his own privacy through his devices. The countries should invests in the knowledge sector. The leaders should try their best for enabling the nation of getting advanced knowledge. If the people have sufficient knowledge about the modern fields then they can protect the country through a comprehensive way. Any country cannot get access to their secrets. The diplomats of a country can make a strong diplomacy for the safety of their country. So, these alternative ways can protect the country from the domination of the rival country.

The investment in knowledge provides the bright future but the knowledge requires resources in various fields. The resources are essential part of the in every fulfilling the every aspects of life. The knowledge enables a man to find the alternative means of resources. If an individual cannot find the one source he will tends towards another source. As **The knowledge is a**

light." As the knowledge is a light through the help of this light a man can find alternative ways. For example if a man live in a desert he cannot produce proper access to light he can generate the light through the help of solar energy. In this way he will be able to get the access of energy. The knowledge create various ways for the person. It gives ~~the~~ the solution of the existing problems.

Investment in other social sectors provides a better future but the investment in knowledge also create various means for fulfilling the basic needs of life. Although bread and butter is the basic purpose of an individual's life. ~~but the~~ The knowledge guides us that how we can get the ways for the acquiring this need through a comprehensive way. It ~~te~~ gives the ideas of small business. The unemployment is becoming the greater issue of the world. but it can be resolved through the help of ~~the~~ opening small business. In this way the problem of

earning ~~resolve~~ the ^{money for} basic needs fulfillment through the help of knowledge.

The criminal ratio in the world is increasing in various forms. It can be resolved if the government invests in creating jobs for an individual. This is not the solution. It has short tempered effect. When the society is illiterate and unaware about the strict punishment of law then the whole society will become a peaceful society. As "give me educated mother. I will give you the educated generation" (Imam Ghazali). When the nation is educated it becomes the law abiding society. The ratio of the crime will decrease.

In a nut shell, it can be concluded that the education is the basic right of a human. The investment in knowledge can bring the prosperity in all aspects of life. It resolves all the issues of society. The issues of economy, social and legal can be resolved through the help of knowledge. The other aspect of life also requires investment like economic, social and other aspects of life. These can cover only one

aspect. The investment in knowledge can produce the opportunities for resolving all the other aspects of life. As through the help of knowledge the country can resolve the domestic issues like poverty, unemployment and social crimes in society. Through the help of knowledge the country can invent the advance equipment for the defense. Knowledge is a precious and unique treasure of the world. Unfortunately, our country spend less than 3% GDP for the education. The rulers should invest in education As

The ruler should invests on books rather than
on bullets.

(Malala Yousafzai)
