

Paragraph

Causes of terrorism in Pakistan

There are numerous causes of terrorism in Pakistan. Extremist groups like BLA and TLP are major contributors. Likewise, sectarian conflicts further initiate terrorist activities in Pakistan. Certainly, proxy war and anti-Pakistan funds, especially by India, strengthen terrorist networks. However, lack of awareness and unemployment also led terrorism. Similarly, extremist groups are involved in a killing of innocent citizens.

For instance, In May 2023, Train hijacked by BLA, Dubbed as "Fitna-e-Hindustan" killed more than 33 passengers. In addition, sectarian conflicts in Frontier areas are another major factor. For example, hostilities escalated in Parachinar resulted in 130 casualties. Conversely, India has allegedly initiated a proxy war in Pakistan by funding terrorist groups. Notably, Pakistan national security institutions have identified Indian National Security Advisor Ajit Doval as the "chief architect of terrorism" in Pakistan. On the other hand poverty and unemployment in Pakistan involved youth to escalate terrorism. A UN report indicates 49 percent poverty in Pakistan. However, many solutions are required to combat terrorism such as government should take kinetic measures to counter terrorism and initiate military operations where

needed. Moreover expand employment opportunities for youth to divert them from terrorism. In essence, for a progressive present and future, terrorism should be eradicated from its roots.

Causes of terrorism in Pakistan

Work on your argumentation

Convey your ideas in a well articulated manner

Outline

There is a difference between terrorism and extremism

Use your words very carefully.

Provoke, involve, insurgency, terrorism, extremism don't mix them
