

Comprehension 2018

Question: 1

This generation does not know how to make an effective use of knowledge. Science has led to inventions & machines in order to make our lives easier and comfortable. However, instead of making machines our servant they have become our masters. We need to fulfill their needs first to get our work done. According to the author, our dependency on them is increasing day by day. Therefore, we need submit to their requirements.

Poor sentence structure in the first part of the answer.

Question: 2

Machines save time and effort but according to the author, people do not use it meaningfully. Machines are made to make our work less complicated and give us more free time to enjoy and rest. However, we use this time in making more and better machines and this cycle continues. Therefore, it has become a curse than a blessing because there is no productive use of that extra time we get from those machines.

Question 3.
