4.1.3 Through media awareness

4.2 Systematic Preventive measure

4.2.1 More Rehab centres

4.2.2 Strict laws against drugs

4.2.3 Eradication of drugs Mafia

5: Conclusion:

Topic: Increasing Use Of Drugs In Modern Age

(Introduction)

The first thing that happens to an addict is not the loss of health but loss of hope. Drugs are cursed for society. It is evident that so many lives have ended because of this wicked habit. It has not only caused deterioration of individuals but also damage the relations linked with that individual. It is one of the biggest evil that can act as a barrier to the development of nation. A nation can achieve its targets if its youth is productive. If its not and if its indulged into this devilish act than it can be harmful for the whole nation. This should be cured otherwise it can eat away the progress like hyenas eat the left over. Increasing use of drugs are caused by many factors such as social, economical, psychological and systematic failures and it leads to serious consequences as well as on individual, social & economical level.

Therefore, preventive measures must be taken at institutional and state level to get rid of this curse.
