formal way

In this age where world is more divided than ever, the hearts of people are divided than ever. The decline of civilization is not because of single reason but because of root reason i.e intolerance. The world is full of diversity but still humans are unable to coexist with differences in opinion, ideas and religion. There are many reasons behind such attitudes some of them are class differences, unemployment and political crisis. Intolerance has many factors some of them include social and religious injustice, lack of education and political instability, it needs to be solved as it has adverse effects on society such as brain drain, democratic threat, hatred among people but it need to be resolved by rule of law, educating people and provision of basic human rights.

Grammatical error

Firstly, one of the major cause of intolerance is social and religious injustice which is very prominent in

our society. There is a bitter huge difference between rich and poor. This class difference is increasing day by day. Rich is getting richer and poor is becoming poorer. This is the main reason of hatred among them. It is making people insensitive they don't care and there is an air of intolerance in our society. People are not ready to accept others

Not valid reference

views. There are extremists in our society they are not ready for any kind of change. They are just following the customs blindly the visible. A recent example is the case of Bano Bibi and Ahsan Ullah of Balochistan tribe. Their marriage was not acceptable by their family and society and that's why they got killed in the broad-light. There are other cases also that occur on the name of Islam. There are plenty of false blasphemy cases in our system. One of the highlighted case is the case of Asia Bibi who got a conflict with a muslim lady

in the fields. In 2010 she got the death sentence by Pakistan Panel court (PPC), she served in confinement till 2018, and then she was sent to Canada Asylum with her family as she got death threats here. There are thousand of false cases and mob violence in our society due to intolerance.

Secondly, economic and political instability are gaslighting the feeling of intolerance. In our society as there are very less opportunities for our youth. and due to unemployment there is economic disparity around our society. In Pakistan around 6.3% of people are without jobs and if there is job the salaries are less. It is getting difficult for lower & middle class people to meet their basic needs. They are unable to educate their generation and even basic necessities like proper food, shelter etc. This condition is promoting the sense of intolerance in them. They are more aggressive and always ready to fight and creating unrest in the society. Other than this

nation is disappointed by its leaders as they are not able to fulfill their promises of progress and development. Our leaders are mostly focus on those projects in which they find their benefits. Again the people of lower class and middle class are getting ignored and they feel like abandon child. These conditions leads to unrest in the country as mobs and protest are witnessed by everyone. Mostly people who are in those mobs belongs to lower class as they become intolerant and the vent their emotions out because of mob and protest. They become intolerant and even little situations can trigger them. Political leaders in their campaigns assure people to solve their problems but later on they focus on big projects which ~~are~~ is one of the major problem of intolerance.

Thirdly, Lack of education is also one of the big crisis or dilemma of our society. Our education ministers are not doing their work properly.

There is old curriculum in our education system and they are not teaching our generation the basic moral values. Patience, tolerance, fairness seem like fairytales. Teachers are not tolerant enough to accept new view or aspects from the students. There is dictatorship and due to such environment most of the students dropout or they don't take interest in the studies. Even those who got degrees, they are still ignorant. Education doesn't merely mean that you cram about facts and figures. Education is a source of enlightenment, it teaches human the way of life, morality but in our society we have witnessed Marshal Khan Lynching case in 2017. That case was a true example of how educated people can act like ignorant people. The reason behind such cases is intolerance. The root cause of this problem starts from the domestic environment, then influence of surrounding and then this got

into the system of individuals. They follow the mob, they have lost their individuality. Lastly, now comes the MEDIA, our generation is linked with this in a very deep way. Media is not only the source of information but it build our character also. It is a strong force that is driving our generation's thinking. Media, now a days, has forgotten its role to reform society. Our news channels are delivering hate speeches, our youth is ~~busying~~ in trolling. Intolerance ~~can~~ be seen in many cases which are related to media. Hate crimes are done many times with the influence of social media. As in recent Pak-India conflict, our social media was full of memes, which can provoke other party instead of keeping peace. Media shows how negative content is getting viral and how life of people are changing and this is inculminating ignorance and intolerance in society.
