3.2.3. Flooding.

3.3. Pollution

3.3.1. Air pollution

3.3.2. Water pollution

3.3.3. Land pollution.

OR.

3.3.1. Respiratory diseases.

3.3.2. threat to aquatic life

3.3.3. Soil Contamination.

3.4. Losing our Agricultural Heritage

3.4.1. Food insecurity

3.4.2. Economic Crisis.

Conclusion.

The Essay.

Pakistan has enough resources for our need, but not enough for our greed. We are the first generation to feel the impact of climate change & last generation that can do something about it. Modern life style has significant impact on our climate e.g. Deforestation, Burning of fossil fuels, industrialization & insufficient use of Natural resources poses serious threat to biodiversity, natural reservoirs, human health & our economy. Unless we take collective actions to address these issues, we will be left with a barren future.
