Assignment NO : 01

Climate change in Pakistan: Causes and Consequences

- | | |
|-------------------------------------|--------------------------|
| • Deforestation | • Impact on Human health |
| • Transportation | • Natural Disasters |
| • Use of Plastic | • Glacial Melting |
| • Unplanned Infrastructure Projects | • Extreme Heatwave |

Topic :

**Climate change in Pakistan:
Causes and Consequences**

Outlines :

1- Introduction

1.1 - Hook

1.2 - Statement

1.3 - Thesis Statement

2- Causes of Climate change in Pakistan

2.1 - Deforestation

2.1.1 - Lossing Carbon

2.1.2 - Lossing biodiversity

2.1.3 - Rissing temperature

2.2 - Transportation

2.2.1 - Causing air pollution

2.2.2 - Increasing CO_2

2.2.3 - Warming climate

2.3 - Use of Plastic

2.3.1 - Manufacturing emit greenhouse gases

2.3.2 - Burning Cause air pollution

2.3.3 - Destroying ecosystem

2.4 - Unplanned Infrastructure Projects

2.4.1 - Lossing green covers

2.4.2 - Increasing Urban heat

2.4.3 - Frequently Landsliding

3 - Consequences of Climate change in Pakistan

3.1 - Impact on Human Health

3.1.1 - Spreading Infectious Diseases

3.1.2 - Breathing Problems

3.1.3 - Causing mental Illness

3.2 - Natural Disasters

3.2.1 - Frequently flood

3.2.2 - Causing soil Erosion

3.2.3 - Lossing Livestock.

3.3 - Glacial Melting

3.3.1 Disrupting river flow

3.3.2 Increasing risk of GLOFs

3.3.3 Changing weather Patterns

3.4 - Extreme Heatwaves

3.4.1 Damaging agriculture

3.4.2 Worsening water Scarcity

3.4.3 Threatening human health

4 - Conclusion

The Essay

"We are the first generation to feel the impact of climate change and the last generation that can do something about it" Barack Obama says. Climate change means a big and long term change in the weather of the earth. People around the world are talking about it because it is an important issue for Planet earth. Humans are facing these challenges because of their activities that release greenhouse gases into the atmosphere and these gases also affect human health. Discussions about Climate Change are common in politics, Science and education. Public awareness and sustainable practices play a role in new societies respond to these changes. Unfortunately, the case of Pakistan is facing a problem in climate change.

because of Deforestation, transportation use of plastic and Unplanned Infrastructure projects. These causes of Climate change ~~ia~~ have a drastic impacts; impact on human health, natural disasters, glacial melting and extreme heatwave. Unless the issues of climate change are addressed properly, Pakistan can neither become prosperous nor respectable.
