Assignment :
Question :

Climate change in Pakistan
Causes & Consequences

Brainstorm Climate change

DATE: _____

DAY: _____

Outline :

1: Introduction

1.1: Attention grabber / Hook

1.2: Background information / supporting sentence

1.3: Introduction of climate change

2: Main body

Causes of climate change in Pakistan

2.1: Global Factor

2.2: Green house gas Emission

2.3: Deforestation

2.4: Air pollution

2.5: Agriculture

3: Consequences of climate change:

3.1: Environmental impacts

a: Weather Events

b: Sea level rise

c: Water scarcity

3.2: Socio Economic Impact

i): Agriculture

ii): Food Security

iii): Public health

iv): Displacement & Migration

3.3: Conclusion

Introduction:

For millions of Pakistanis, climate change isn't a distant threat; it's a daily reality marked by displacement, food insecurity, and loss of livelihood. Climate change poses a significant threat to Pakistan, stemming from a combination of its geographical location, diverse topography & socio-economic factors leading to increased frequency & intensity of Extreme weather events like floods, droughts & heat waves. These events are exacerbated by factors like deforestation, pollution and rising temperature, impacting agriculture, water resources, and human health.
