Women Empowerment.

Women Empowerment means granting women equal opportunities and full control over their lives. Women should be allowed to make informed choices, participate in decision making and full access to resources like education and healthcare. Women's empowerment not only benefits them but also families and the broader society. It is a fundamental human rights issue and crucial for achieving sustainable development goals. History has proved it. Women like Mohatma Fatima Jinnah, Benazir Bhutto, Maryam Nawaz, Justice Ayesha Malik, Lt. General Nigar Johar, Mountaineer Samina Baig have done great contributions to their respective fields. Michelle Obama, the former first Lady of US, stated, "There is no limit to what we, as women, can accomplish." According to Pakistan Bureau of Statistics (PBS) 7th Population and Housing Census - 2023, the female population of Pakistan

is 48.51 percent of the total population of Pakistan. Depriving half of the population from progress and contributing to country's development will result in decline of society and country's development.
