

Topic: "Climate Change in Pakistan: Causes and Consequences."

1. Over population
2. Transportation
3. Industrialization
4. Deforestation
5. poor cultivating system

1. Rapid Glacier Melting
2. floods
3. increasing summer period
4. Health Issue
5. food security

outline

1. Introduction:

1.1 = Hook

1.2 = General statements

1.3 = Thesis statement: Climate change is one of the major problem faced by Pakistan. It has many causes such as overpopulation, Transportation, industrialization, deforestation and poor cultivating system, leads to severe consequences like Rapid Glacier melting, floods increasing summer period, health issues and food security.

2 = Causes of climate change in Pakistan

2.1 = Overpopulation

- 2.1.1 = Increasing in Urban cities
- 2.1.2 = Spreading pollution
- 2.1.3 = poor sewerage system
- 2.1.4 = Usage of Buses

2.2 = Transportation

- 2.2.1 = increasing personal Transport
- 2.2.2 = poor conditions of Transport
- 2.2.3 = Lack of public Transport
- 2.2.4 = Over Traffic

2.3 = Industrialization

- 2.3.1 = Industrial emissions
- 2.3.2 = Uses of fossil fuels
- ~~2.3.3 =~~

2.4 = Deforestation

- 2.4.1 = Increasing Level of Carbondioxide
- 2.4.2 = cut down of trees
- 2.4.3 = plant have absorb ability and produce oxygen.

2.4 = poor cultivating system

- 2.4.1 = Burning cultivation
- 2.4.2 = Flood irrigation System
- 2.4.3 = Use of poor machinery

3- Consequence of climate change in Pakistan.

3.1- Rapid Glacier melting

3.2- floods,

3.3- Increasing summer period

3.4- Health issues

3.5- Food security

(4) Conclusion

= The Essay =

Pakistan is dealing with the consequences of climate change so far, don't for causes of climate change. Climate change is neither a new issue nor is it fully settled one. Pakistan faced numerous climate change consequences throughout its history.

The 2010 and 2022 flood were particularly devastating, causing widespread damage and loss of life. Developed countries are dealing with successfully, whereas underdeveloped countries are still struggling.

Unfortunately, Pakistan is one of them. Climate change is one of the major problems faced by Pakistan. It has many causes such as overpopulation, transportation, industrialization, deforestation and poor cultivating system, which leads to severe consequences like rapid glacier melting, flood, increasing summer period, health issues and food security. These causes are not new in the nature but their intensity is far greater in Pakistan.

Unless these causes are addressed properly, these consequences will damage all humans. These problems are not descended from heavens but they are man-made. So serious and honest efforts are needed to solve these issues. Therefore, the main aim of this essay is to discuss causes of climate change in Pakistan along

with their consequences.

Point: Working in an Plant is the
Worst Job, I ever had

Reason 1: The work was physically hard.

- (a) Load carton onto skids for ten hours a night
- (b) Each carton contained twenty-five pound of bottle.

Reason 2: Second bad feature of job was the pay.

(a) minimum wage \$3.65 an hour.

(b) had to work sixty hours for decent late home pay.

Reason 3: hated working condition

(a) Two ten-minute breaks and an unpaid lunch

(b) loading dock in near zero temperature.

(c) Loneliness on job

(1) no interests in common with other coworkers

(2) By myself for two hour cleaning the apple
vats
