

Topic: The role of entrepreneurship
in economic growth

Entrepreneurship is a new idea or productive idea to start innovative

business. Entrepreneurs think about a new idea and then implement it in market. Entrepreneurs usually ~~so~~ produce a product which is problem solving or creative. Usually this product is a new invention in market. Because product is new or it doesn't have competitor in market and it is useful, it increases the marketing level. Product is sell out in market like a hot cake. People love the new invention in market. On the other hand, entrepreneurship ~~is~~ generate new jobs and opportunities which are helpful ~~to~~ to deal with poverty. Entrepreneurship not only helpful for its owner but it is also very helpful ~~on~~ on national or international level. It greatly impact on stock marketing and economic growth. The more advancement in entrepreneurship, the more economic of a country grows.
