Make a short and generalized thesis statement

## The Essay

Earth is an amazing place to live. Look around it is full of beautiful mountains, lush green rainforests, Waterfalls, Vallies, oceans and a habitat of different species. It is the only planet where life is possible but unfortunately certain activities of humans are causing severe climatic changes that are destroying it. Along with other countries, Pakistan is also facing severe climatic changes. Due to burning of hazardous products in atmosphere, excessive cutting of forests, use of smoke emitting vehicles, overpopulation, lack of education and lack of sense of responsibility among citizens. These activities of humans causing serious destruction. Now, citizens of Pakistan are facing consequences such as pollution, spreading of diseases, short duration of seasons, deforestation, reduction in natural resources and occuring of natural disasters. As long as Pakistan doesnot take the problem of climate change seriously, no serious solutions would come out.

Pakistan has to take precautionary steps to take control over this destruction in order to make the country prosperous.

First make proper outline

Introduction is also not fine

Properly write hook/attention grabber

Adopt formal writing style

Bring coherence in your paragraph

Write thesis statement in your intrograph
