Day: Thursday

PMS  
2020

Practice:

We are not <sup>the</sup> first nation of the world to face strategic and geographical imbalance. Count how many countries in the world are landlocked. Who are neighbors of nations many times larger than themselves. We are not ~~the~~ only country in the world facing resource shortages. Why did not others use our formula for development and integrity to increase their population sevenfold in seventy years? The illiterate population increased threefold<sup>d</sup>. The quality of education has deteriorated to such an extent that those educated within the country have become worthless in job market. Foreign exchange reserves have not exceeded a single digit figure for the last twenty years. It turns out that the government is investigating where the foreign loans have gone taken over the last ten years. A simple measure for country's management is how many lives and financial resources are lost due to state policies?

Day: \_\_\_\_\_

In the analysis of terrorism, we easily  
give the figure of seventy-thousand  
deaths. It is the Glory of God that  
those who justify terrorism, today  
claiming to resist terrorism. The  
economy cannot run without political  
stability.
