~~Title:~~ Impacts Of Climate On Human Energy  
~~And Survival~~

~~Precis:~~

In temperate countries, cold climate boosts energy. While presence of obstacles creates despair, their absence hinders physical action. But efforts against hindrance activate energy back. Likewise, as excessive cold suppresses energy, in contrast, hot climate requires minimum effort, moderate cold has refreshing results on human race. In cold climate, man is involved in laborious work for building shelter, acquiring warm clothes to keep himself cozy. Additionally, he needs nutritious food to prevent his body tissues from deteriorating. However, conditions vary across tropical regions where there is minimum requirement of food and clothing. ~~and can spend the whole day idly.~~ Seasonal variations ~~sim-~~ilarly influence human behaviour with colder months encouraging greater activity. Thus, a climate plays a vital role in shaping human energy and productivity.

~~Title:~~ The Ancient Greek Soothsayers :

~~Precis:~~

~~When~~ Faced with the mysteries of life and vastness of nature, ~~the~~ Ancient Greeks sought to communicate with gods. They believed that these divine powers always operated the universe and decided their fates. This wish led to the art of decoding signs of gods. ~~that was practiced by ancient Greek soothsayers.~~ These practices were carried out by observing rolls of thunders, flights of birds, traits of sacrificial animals, interpretation of dreams and palm lines. At times, Gods spoke to the people directly through intermediaries. These practices formed the basis of Greek oracles, each located in a sacred sanctuary and linked to a specific god. The oracle at Delphi, associated with Apollo, was the most renowned, while the oldest, Dodona, was connected to Zeus.
