

The status of Women and advance technologies

As it is famously said by Heraclitus — a Greek Philosopher that "The only permanent in this world is change" means that human evolution embodies the essence of change. From hunter-gatherer society to agrarian, and since the advent of steam engine in Britain the world has witnessed drastic changes in its conducts. In particular, Scientific revolution has brought immediate change in the form of new technologies which has impacted all the segments of society especially women. Rapid digitalization has advanced and reformed the role of women in economic affairs. Smart phone culture has become need of the hour to stay connected with current happenings, this trend has empowered the status of women — while remaining in touch with global affairs. Online Learning Platforms such as Artificial intelligence and Deep-seek have paved the way for women education without

Going anywhere. Digital revolution has brought us with alternative means of social awareness regarding the equal rights of women, for instance, Twitter, Facebook and Instagram. Gender inclusivity has enhanced since the interconnectedness has optimized the way for all sects, genders and races to participate in economic hustles.

In contrary, it is witnessed a huge gender gap that technology has escalated for various reasons:

Poor digital infrastructure, tribalistic society, despotic social norms and anti-change or anti-plural approach.

Technology is a double edge sword, if it is positively used while grasping digital ethics, it has tremendous potential to bring a positive change. If the access of new technologies got hampered for what so reasons then it would be resulted into a stunt growth of society to compete with the modern changing world. In short, this piece of writing is going to unearth that how new technologies have ever impacted the status of women at individual, domestic and global level.

The test of civilization is its estimates of women.

"One is not born, but rather becomes, a woman" Simone de Beauvoir testifies that womanhood is a social construct. The fragility of women is the result of their weak physical strength, submissive history and structural inequality to portray women as an 'other' gender: subjugated by the muscle power of men. But western civilization has broken those shackles of patriarchy and held women under its cap of equality and fraternity. Any civilization can be tested by its policies, regarding women inclusion in every domain of life especially in political apparatus. The upsurge of nation-state system after the westphalian peace, the gender equality became no more a myth. The United Nations (UN) Charter upholds the principle of dignity, equality and justice for the every segment of a society. Gender disparity has

~~It~~ been ~~achieved~~ neglected by
providing job opportunities to women.
Political Participation of women
is another milestone which a
civilized nation can achieve to
touch the peaks of progression
and development. Human capital
is crucial for the sustainability
of a civilization. It can be
estimated, the level of a civilization
in this modern era that how
many women take part in
the economic dealings and labour
force to make it more prosperous
by generating more revenue. Women's
role in political diplomacy facilitates
into a peaceful negotiation and
better ends. The marvellous role
of women in defense system
intensifies the man power and
sharp decision making during the
war. In short, this essay
acknowledged that a civilization
can be estimated in its strength,
by analysing the socio-political
and economic participation of
its women.

Women are the real architects of society

It is a famous African Proverb "When You educate a man; you educate an individual; When you educate a woman; You educate a generation." Throughout the human history, it has been experienced that women and men both are equally significant for the evolution of better society. Undoubtedly, women have suffered a lot due to various reasons such as patriarchal norms, lack of education and fragile participation in socio-economic and political activities. Without any doubt; women are the real architect of society because of her divinely traits. An empowered woman proves as successful stakeholder of family and responsible custodian in the making of a prosperous society. It is pertinent that higher the participation of women in political decision making means higher the ration of social inclusion and innovation. Financial stability is the dire need for an empowered

women to fully play its role in household activities. Gender disparity gap can be mitigated by optimizing the role of women as holy and legal in society.

Domestic violence, early child marriages, dowry, sexual assault and well-street harassment are those heinous crimes which has derailed progression and positive development in society. By endowing quality education and financial security to women one can truly uplift the society from poverty to wealthy and crime free society.

However, the role of men is crucial in order to achieve these desired objectives. Digital platforms can be used to proselytize the anti-women norms by disseminating women inclusivity and gender friendly awareness. Digital Platforms can be utilized to disseminate inclusive and gender-sensitive content, challenging discriminatory attitudes against women.

Thereby, an educated women enable to craft a progressive and developed society. In short, this discourse acknowledged that women empowerment is a crucial

tool for the establishment of a
society based upon peace and security.

Body Paragraphs

Firstly, the mass level of deforestation is a key cause of global warming. Trees are naturally the producers of Oxygen and it can simultaneously absorb carbon dioxide (CO_2) from the air. In other words, it can be assumed that trees are climate moderators. Deforestation means the cutting of forests at large which depicts the human intervention in the divinely conducts of Mother nature. For instance; the 2022 report of World Wildlife Fund (WWF) states that global temperature of earth has raised; 22% solely because of massive deforestation. Hence, it is manifested that deforestation is the source of environmental degradation which subsequently increases the global temperature.
