- (iv) Make artificial machines which control the impact of climate change.

5- Cons in Education in Pakistan

- (i) Insufficient budget for education
- (ii) Barriers on Girl's Education in Rural Areas
- (iii) Corruption in Education Department
- (iv) Lack use of Modern Technology
- (v) Not Equally divided Job quota to Rural and Urban Areas.
- (iv) Lack in curriculum for students.

6- Pros For Education in Pakistan

- (i) Remove Barriers on Girl's Education
- (ii) Government must control on corruption
- (iii) Making of proper curriculum
- (iv) Divide Equally quota to Rural and Urban Areas
- (ii) Government must give highly budget to Education Department.

7. Conclusion:

To the conclusion, the ills which has discussed are backwardness but if the government like actions which has discussed in above then the country will get out these hurdles and developed in proper way.

Essay

Introduction:

To begin with, creation of Pakistan, many problems are coming in the route of our country in every aspect, which will block its development. Health care in Pakistan is not good as compare to past decades due to lack concentration of Government. Similarly, Education of the people of Pakistan going towards diversity due to facing many hurdles in its way which cannot overcome since the foundation of this country. These all are backwardness of developing of Pakistan. People are not getting interested in Education and health maintenance because of poor condition of their families. But when the people started in proper way in both these they will develop Pakistan's Economy stronger in most perfect way.

In the above paragraph, discussed about introduction in overview, neglected reason and characteristics from the base of Pakistan.

To start with the ills in health care, there is lack of purity in products such as: Milk, eggs, cooking oil, flour, and glossary, which are not pure in 21st century in Pakistan. Health diseases has started from productivity of food. Many companies are mixed chemicals in in food which will cause of cancer and many other diseases for every age person. The companies are not making products in purity due to lack of inspection of head of of companies. This impurity going to backwardness for the people of Pakistan.

Inflation rate has risen in Pakistan due to which the people cannot

afford food and medicines. The policies of IMF bailout is tough for Pakistani people. As compare to past decades, the rate of inflation has risen above 60% specially for poor which cannot afford things properly for their health care. In Budget packages, the government give high budget to health but in the end phase inflation has broken down the backbone of poor people, which are facing many hurdles in their health protection.

Similarly, the change of climate is the main cause of health care of people in which many people infect. If look at the impacts of climate change, they were flood of 2010, which was the cause of many deaths and health issues in the shape of arisen diseases, which was faced by many people and COVID-19, which was the main hurdle in Pakistan's people in

which many people faces complication in their health care till the date, covid's impact on the people was horrid for their health in which many people are not covered their health properly till now.

In many areas of Pakistan, there are people which drink spoil water and eat spoil food due to poor condition, lack of jobs, and inflation rate, which will impact on people's health care. Government do not look properly on their condition, while they provided spoil water and food.

The poor people do not afford medicines due to high rates of medicines. The mafia increases the rates by their self and the poor cannot look their health condition and specially the children are takes health condition. It all will increases diseases, if the people do not take medicines properly.

In the above paragraphs, discussed about the ills ~~which are~~ of health are faced by the people due to lack of concentration in condition of health by the Government. If the Government will not take action immediately, then Pakistan will go towards its backwardness.

To start with the Remedies for health protection. The Government must concentrate on the manufacturer of products. Give orders to improve their condition of manufacture to companies, and factories. Government must action against mafia which robbery of medicines and rises prices of medicines, products, and other useful things for people's health maintenance.

The Government must provide

highly doctors to every government hospitals and give quota of job to poor people that they can change their condition to look after their remote areas. Pakistan has need of doctors which qualified with modern technology.

Pakistan must take step towards new modern artificial technology which will provide good health care to the people in every aspect of health such as medicines, water for drink, foods, climate change and corruption in the computerized system. They all solutions for health care in which Pakistan will not going towards its backwardness.

In the above paragraphs, discussed about Remedies for health care, in which our country will save from backwardness. If the Government must take action then

Pakistan will among the developed countries.

To begin with the cons in education department, there is lack of insufficient budget for education in which the province do not give their cities budget for education properly. And in schools there is lack of education. Because if the budget will not provide properly then how they open school.

In many rural areas, still there is barrier on the girl's education, in which the girls are not educated and are not take participation in many fields. In rural areas there is not concept of girls education, which is broken down its development. Similarly, the corruption is increases day by day which is going towards neglected the education. And its impacts are very horrid for the development of our country. In school there is still lack of

modern technology, children are not get advantage from it. The students which are experienced with the chemicals and other activities without modern technologies, they will not much experience about these and they will not get job early because of lack of modern technology in use of proper education.

There is not equal quota system for job in rural and urban. The people which live in urban get job easily as compare to people live in rural areas. Already in rural areas there is lack of education and if the quota system will not divide equally then the people going towards its backwardness day by day. Furthermore, the Government has not giving proper curriculum to the schools for students then how they will get education in a proper way. There is lack of also qualified teachers which the guide properly the curriculum to students.

In the above paragraphs, discussed about cons in education, which neglected its development for the future of Pakistan. If our country will not overcome on it will become main reason for backwardness of education.

To start, with the Pros of education, The people live in rural areas remove barrier on the girls education and give them chance to participate and improve their and country's condition. Secondly, the government must stop corruption in education department that the people get education properly in every part of country. Making proper curriculum for the students by add many new modern things which help to students to get education in new modern way. The government must provide equal quota to rural and urban areas that they get job equally, and provide highly

qualified teachers to rural areas according to quota. Also give equal budget to education as compare to other department the provinces provide budget to every areas and the the school are not opened yet then opened for the children which needy.

In the above paragraph, discussed about Pros for education that the country escape from hurdles which is now faces Pakistan. Through these remedies the education will strong for the development of Pakistan.

To sum up, the Ills and Pros which has discussed in the above paragraphs are backwardness but if the government must focus on the pros which has discussed in above paragraphs then the country will developed fast. Such as Improving the manufacturer of products, take against

media, provide highly qualified doctors, introduce modern technologies, remove barriers in health care and remove barriers on girls education, give proper budget for education, overcome the corruption, provide equal quota system and make proper curriculum for education, these all are the roadmap of development of Pakistan.
