4. Conclusion

There is no ~~more~~ powerful than ~~women~~ determined to rise. Scope of frailty is name of women is just restricted to a stereotype. ~~Women have expressed that~~ However, women in all direction of life. Firstly, participation of women in global power politics ensures that frailty is ~~not~~ the name of women. Additionally, relentless struggle of women for restoring the democracy proves that ~~some~~ is no more weak. Moreover, extensive role of women in social stability is a powerful testimony of their strength. Similarly, flabbergasted achievements of women in a field of sports not only ~~shows~~ their physical strength but also a sign of their talent. In a similar way, role of women in economic activities are the outcome of their cognitive skills. ~~Command over sentence structure is fine~~ In addition to it, performance and art of acting in the film industry is another evidence of their chemistry. Women and their participation side by side with men is a stamp that shows their writing techniques. Finally, they have learnt to fight for their rights by their

own, which strongly support the stance that women is no more weak.

All in all, inclusivity and participation of women in power politics, restoring social stability and democracy, significant contribution in economic sphere, and their revealing talent in extra curricular activities proves that frailty is no more the name of women.

In the late 1880s, women were ~~vulnerable~~ <sup>Women were more vulnerable</sup>. They were striving for the basic rights and their identity. After the great efforts of women they got suffrage right from government. Along with the suffrage rights their identity in the different platform of society were their hurdles. 13<sup>th</sup> amendment in the US Constitution creates ease for them by giving them identity. In addition to it, voting rights were one of their desire to be ensured. With the passage of time and by their extraordinary efforts they get the all fundamental right. They were no more subject to frailty in the environment of power politics, economics, and social affairs of daily life.

There are multitudes of examples, evidences and anecdotes which are proving the topic; finally, no more the name of women; one of them is increasing role of women in political arena across the globe. Participation in politics ensures an individual is strong enough to counter the strutting blocks of the society. Kamala Harris: a forerunner of presidential election held in 2024. which ensures women is no more weak. Additionally, Georgia Meloni is another example which is prime minister of Italy. The above examples satisfied the; finally is no more the name of women once they are participating in not only politics but in power politics.

Similarly, women have given their role in the military affairs of country. Paying the efforts in the military service is not a work of sluggish individual. First female lieutenant general of Pakistan Army Nigar Johar ensures that they foster their mind to counter the impediments of life. Their cognitive skills are proving the header. I go, taking part of women in the military.

affairs ensures frailty is no more the name of women.

Additionally, women and their relentless struggle for the nourishment of ~~democracy~~ ~~is a shag and~~ worst form of governance. To be a rock in front of dictator needs a great courage. Benazir Bhutto puts all the efforts to ~~to~~ ~~the~~ democracy. Additionally, Aung San Suu Kyi's fight against dictatorship in Myanmar is sign of ~~domtless~~ ~~In a nut~~ shell, struggle of women for restoring democracy supports frailty is no more the name of women.

Women have learnt

~~has learnt~~ ~~to~~ ~~by their own~~ Individual of society needs courage to stand in the way of ~~ing~~ ~~rights~~ of society in order to ~~get~~ ~~rights~~. Asma Jahangir and her struggle for saving, safeguarding, human rights in Pakistan was a courageous act. Similarly, Shanmeen obaid Chiny stood like a rock to ~~con~~ ~~the~~ inhuman act in the society. In a nut shell, women has got tactics to ~~grab~~ ~~their~~ rights.

Moreover, extensive role of women in social stability is a powerful testament of their strength. In order to bring social stability, one have to climb the mountains.

Harriet Bacher says "women is the real architects of society". which gives the image vivify: women plays an pivotal role in the construction of any society. All in all, expanded participation of women in the social, domestic affairs, platforms are the illucidation of their strengths.

In a some manner, extraordinary achievements of women in a field of sports uncover their physical strength. Involvement in the sports needs the strong concentration and will power for success. Naseem Hommed proves it by achieving the title of fastest women of Asia. In addition to it, Mehak Gul, 15 year old Pakistani girl got the award of chess champion. which adds fuel in their strengths. Ergo, outstanding performance of women in sports and achieving the success are the evident of their talent and physical strength.

Furthermore, women and their parallel competition with men in the sphere of literature garishes their skills. In 1800s, readers avoid the writings of women due to lack of knowledge of their books. But, Umberto Eco, a famous Italian novelist, ends this stereotype by her writing skills. Likewise, Elif Shafak, a Turkish writer, and her international best selling book are the evidences of their cognitive. Hence, side by side competition of women with men polishes their skills and talent.

Women have made their talent a reality. ~~For~~ ~~showing~~ ~~their~~ ~~talent~~ ~~in~~ ~~the~~ arena of arts and music. Arts and music needs the streamlining of talent and desire together. Increasing role of women in the film industry across the globe and their extraordinary performance reflect the consciousness they hold. Indian film industry is on 3rd in the world whereby, 80% of women are playing their role. In recapitulation, women has gain muscles in film industry as well.

Concurrently, formidable tasks performed by women substantiate that frailty is no more the name of women. Reaching the peaks of the region is not a sign of weak individual. A great example of Samina Baig who conquered the Mount Everest. Together with, Hanan Saleem. became first Pakistani women to reach the North and South pole. It shows the struggle and determination of women. In light of the above information, hard task performed by the women reflects their strengths and power they hold.

Simultaneously, increasing participation of women in economic activities and its result in the form of economic boost is outcome of their accounting abilities. But in 1800, women were kept away from economy due to lack of abilities. However, growing women labour force in Bangladesh and rise in the GDP growth rate. They make sure that every task can be entrusted to women so, the northward movement of women in economic reflects their abilities and strengths.

Respectively, significant contribution of women in the field of science reveals their strong mental capability. The field of science needs tremendous and consistent efforts for favorable outcomes. Contribution of Mericure in Nuclear physics is strong flashback of her talent. Similarly, Egypt's first nuclear physicist, Dr. Samir Zera, who was prominent in nuclear technology for peaceful purposes. To summarize, women's participation in science reflects their strong capabilities.

In the same way, appearance of women in the competitive exams of Pakistan and securing militant groups are the example of their bravery. A difficult job for a woman was to hold a weapon but in today's time; women are giving their services in the security group. Riazana Malik, assistant superintendent of police, being a woman, she is giving her best in police group of Pakistan in order to show her strengths. In short, women's participation in militant groups reveal their bravery.
