4.1 Knowledge still plays role in informal education

402

Education can be made affordable

5.

## Conclusion

### The essay

During the World War II, Adolf Hitler reportedly sent a message to Winston Churchill with an offer. He said that if Britain did not attack German universities, Germany would also not attack the British universities. Churchill gave strong answer: "We are fighting this war itself for a civilization, and there is no civilization without education to protect." This exchange ascribes the profound value of education and reinforcing the wisdom of Benjamin Franklin "An investment in education pays the best interest." It enhances the economic growth of nations, fosters democracy, enriches national security and establishes skillful work force. Similarly, an investment in knowledge boosts technological advancement, opens the door for opportunities, improves the decision making of individuals, creates a peaceful society, reduces the degradation of environment and develops enormous health care system across the world. Contrarily, some people claim that investment in knowledge does not pay the best interest because education does not guarantee success and

enormous financial burden of education results in economic crisis across the world. Realistically, knowledge still plays enormous role in the informal education and education can be made affordable for individuals. Therefore, an investment in knowledge pays the best interest.

Investment in knowledge enhances the economic growth of a country. A skilled workforce with vocational education contributes to the growth of economy. Professionals play enormous roles in agriculture, industry and overall economic activities of a country. Consequently, the contribution of skillful labors enhance the economic growth of a country. For example, a professional worker in the field of industry assists the smooth production of products. Thus, investment in education contributes to the economic growth of a country.

Besides, investment in education fosters democracy in a state. A knowledgeable persons can ensure the basic principles of democracy. Individuals with literacy always participate in votings. This not only boosts the participation of voters but also democracy. According to **International Crisis Group (ICG)**, largest democratic nations such as India, the USA, Finland and Britain have the highest literacy that contributes in the promotion of democracy. In short, an investment in knowledge fosters the democracy.

Moreover, spending in knowledge enriches national security. Nations with profound diplomacies,

and national security strategies always ensure national security. The strategies and foreign policies of a nation protect the nations from foreign aggressions. Consequently, countries ensure their securities. According to Henry Kissinger "A Diplomacy" nations with enormous foreign policies ensure the national security of their countries. Thus, an investment in knowledge can boost the national security of a nation.

Furthermore, education establishes a strong labour force with skill. Nations with high literacy rate around the world always have skilled labours. Vocational education creates skilled labour force. The skilled labour forces contribute to the progress of a country. For example, the United States has the largest skilled labour force with enormous economic progress. Thus, education contributes to the establishment of a strong labour force.

General comments

Work on Grammar along with sentence structure.

Lack of evidences to support your argument

Weak argumentation..try to make strong and authentic arguments.

Write thesis statement

Introduction is little bit short..
