

H/w

Activity 01

Working in apple plant is the worst job I ever had

Reason 1 The work was physically hard.

- a) loaded cartons on skid for ten hours at night.
- b) Non-stop or continuous loading of heavy cartons

Reason 2: Low wage and extra work.

- a- \$3.65 an hour, plus for quarter extra for working night shift.
- b- Had to work sixty hours for decent take home pay.

Reason 3: Poor working conditions

a) Two ten minute breaks and an unpaid lunch

b) Harsh environmental condition.

c) Loneliness

1) No interest common with other workers

2) By myself cleaning the apple bins for two hours.

Climate change in Pakistan:

Causes and consequence

Brainstorm

Causes

- ⇒ Natural Causes
- ⇒ Human causes
 - Deforestation.
 - Unsustainable industrial
 - Unsustainable agriculture
 - Use of fossil fuel
 - Green house gases emission
 - Urbanization.

Consequence

- ⇒ Rising average temperature
- ⇒ Rising sea level
- ⇒ Retreating glaciers
- ⇒ Changing weather pattern or extreme weather
- ⇒ Heatwaves
- ⇒ Effect natural ecosystem
- ⇒ Frequent natural disasters
- ⇒ Decreasing average production of crop.

Outline

1 Introduction:-

1.1 Hook

1.2 Background

1.3 Thesis statement: Climate change caused by excessive use of fossil fuel unsustainable agricultural and industrial practices has dire consequences for Pakistan. Pakistan is facing flood, droughts, heatwaves, increasing sea levels and decreased crops production due to climate change.

2- Causes of climate change in Pakistan:-

2.1 Natural causes:-

2.1.1 Wildfire

2.1.2 Solar radiations

2.1.3. Change in earth's orbit.

2.2 Human causes:-

2.2.1 Deforestation

2.2.2 Excessive use of fossil fuels

2.2.3 Unsustainable agriculture practices

2.2.4 Unsustainable industrial practices

2.2.5 Using hydrocarbon for energy generation.

3- Consequences of Climate in Pakistan:

- 3.1 Rising average temperature
- 3.2 Melting glaciers and rising sea levels.
- 3.3 Frequent natural disasters like flood and drought
- 3.4 Heatwaves and extreme weather
- 3.5 Loss of Biodiversity.
- 3.6 Decreasing average production of crops.

4. Conclusion

"The essay"

"We are the first generation to feel the effect of Climate change and last to do something about it" (Barack Obama)

Climate change is an existential threat not only to Pakistan but the whole world. Climate change is an issue yet to be properly addressed. Its effects whole world but unfortunately Pakistan is one of the most vulnerable country for global climate change. Climate change caused by excessive use of

fossil fuels, unsustainable industrial and agriculture practices has dire consequence for Pakistan is facing frequent droughts, hailwaves, extreme weather conditions, melting glacier and rising sea level due to

Climate change. There is an immediate need to address the issue.
