

Information technology is a blessing for a reason that it enhances social harmony in the society.

When there are less conflicts and more cooperation, then societies work together and bring more efficient and positive outcomes for them.

Social harmony is ~~very important~~ crucial for growth of any society. Platforms like Facebook and Instagram are continuously worked to highlight the importance of social unity. The Social Harmony organization of Pakistan, first emerged from Facebook, secured the global peace award for increasing harmony between different religious sectors. According to ~~the data~~ ~~the~~ UN Peace Committee, social harmony has increased 38% by the ~~into~~ emergence of social platforms. ~~therefore~~ According to Social Index, the countries, high on that index, has the better economic, social and political performance in the world. Therefore, information technology continues to shape a better future by enhancing social harmony in the society.
