

Precis 2024 (final Draft).

Amidst bustling cities, the urban green spaces provides peace, respite and recreation, also provide sanctum for diverse wildlife which balanced urban development and environment. Beyond their beauty parks plays role in communal interactions, cultural events and urban life enhancement. They improve air quality, reduce heat, and support mental well-being. However, the challenge lies in balancing urbanization, human and environment health, also urban planning is vital for peaceful co-existence between human development and environment.
