Hope is a Life Saviour

In Northern Europe moderate temperature is very beneficial.

Because cold climate makes the people more active by

behaving as a huddle. According

to what huddles are key constituents for human beings to

provoke their hidden energies.

In fact, invincible huddles make the man hopeless, so he becomes

lazy and unambitious. And

Lack of huddles make him

inefficient too because he

doesn't face any challenge

to utilize his energy. Despite

of both these, in moderate

circumstances with few obstacles

a man emerges as more

active and challenging. Because

he possesses a hope to surpass

all the obstructions and this

hope makes him capable to

utilize all of his energies to

face all the hardships with

resilience.
