introduction in a
precise way

A few minutes of high can lead to a lifetime of regret. Drug addiction among youth has become a serious problem in today's world. Many young people, especially teenagers and students, fall into the trap of drugs due to various reasons like peer pressure, mental stress and curiosity. This addiction not only damages their health but also affects their studies, family life and future goals. Today, the problem is worse because drugs are easier to get, and social media often shows them in a way. Understanding why young people start using drugs and what happens as a result can help us find better ways to stop this growing issue.

To begin with, there are many reasons why young people start using drugs. First of all, peer pressure plays a major role. When friends use drugs, many teenagers feel forced to try them just to fit in. Secondly,

Write one para of introduction

mental stress and depression also push youth toward (try) drugs. Academic pressure, family problems or relationship breakups can make young people feel hopeless, and they take drugs to escape reality. In addition, curiosity and lack of awareness also lead youth to try harmful substances without knowing the consequences.

Furthermore, the results of drug addiction are very dangerous. Firstly, it harms both the body and the brain. Addicted youth may suffer from memory loss, heart disease or even die from overdose. Secondly, it affects their education and job life. Many students addicted to drugs stop attending school or fail exams, losing future opportunities. For example, in the past many famous singers lost their careers and lives due to drug addiction. Even today, many young stars struggle with the same issue! Also, drug addiction often causes broken families, crime and emotional pain for everyone involved.
