

Information technology is a blessing
~~for a reason as it~~ that it enhances
social harmony in the society.

When there are less conflicts and
more cooperation, then societies work
together and bring more efficient
and positive outcomes for them.

Social harmony is ~~very important~~ crucial
for growth of ~~any society~~ platforms
like Facebook and Instagram has continuously
worked to highlight the importance of
social unity. The Social Harmony organiza-
-ion of Pakistan, first emerged from
Facebook, secured the global peace
award for increasing harmony between
different religious sectors. According to
~~the data~~ UN Peace Committee,
social harmony has increased 38% by
the ~~into~~ emergence of social platforms.
~~therefore~~ According to Social Index,
the countries, high on that index,
has the better economic, social and
political performance in the world.

Therefore, information technology continues
to shape a better future by
enhancing social harmony in the
society.
