that include less labour or wanted manpower in the country, hindered country's development, Increase in greed and use of unfair means to escape, education ^{left} with no or little value, considered as ladder to move out.

Introduction

Brain drain literal meaning refers to a mind whose intelligence intellect is sifting away. Google a well accredited platform has 100s hundreds of Indians, Asians, similarly Apple & Microsoft have brains of most of developing countries. The lucrative job and work station with prosperous future made Saim a NUST graduate asset of the company but alas! loss of a country as its talent found better place. This is not only Saim's case its nowadays story of every other house of developing

country. This essay highlights the causes pertaining to a migrained issue and on other hand out pouring its dreadfull impact that is staining and weakening country's backbone. The causes are not limited to discussed debate however most important one is the devaluation of young talent others are secondary but play a handfull role in the mass's exodus turnover.
