

Climate change Causes and Consequences:

Brainstorm

Climate change

Outlines

1. Introduction:

1.1 Hook.

1.2 Background.

1.3 Thesis statement.

Climate change is primarily driven by human activities such as the Green house gas emission, deforestation, Natural disasters and waste mismanagement, leading to severe environmental, Economic, Health and social consequences.

2. Causes of Climate change:

~~2.1 Greenhouse gas Emissions.~~

~~2.1.1 Industrial emissions~~

~~2.1.2 Vehicle emissions~~

~~2.1.3 Burning of fossil fuels~~

2.2 Deforestation.

2.2.1 Soil erosion

2.2.2 Infrastructure development

2.2.3 population pressure.

2.3 Natural Disasters:

2.3.1 Floods.

2.3.2 Hurricanes.

2.3.3 Droughts.

2.4 Waste Mismanagement:

2.4.1 Lack of public awareness.

2.4.2 Rapid urbanization.

2.4.3 Industrial waste overload.

3. Consequences of climate change.

3.1 Environmental Impacts:

3.1.1 Rising global Temperatures.

3.1.2 Melting glaciers and ice caps.

3.1.3 More intense weather events.

3.2 Economic Impacts:

3.2.1 Damage to Infrastructure.

3.2.2 Reduced Agricultural yields.

3.2.3 Increased Insurance Costs.

3.3 Human Health Impacts:

3.3.1 Heat stroke Death.

3.3.2 Respiratory illness.

3.3.3 Skin problems.

3.4 Social Impacts:

3.4.1 Climate migration.

3.4.2 Resource conflicts.

3.4.3 Inequality.

The Essay

The last decade was the hottest on record, with global temperatures rising at an unprecedented rate, threatening ecosystems and human societies alike. Climate change refers to long term shifts in temperatures and weather pattern mainly caused

by human activities. Since the Industrial revolution, the burning of fossil fuels like coal, oil and natural gas dramatically increased the concentration of greenhouse gases in the atmosphere. These gases trap heat, leading to a gradual rise in global temperatures a phenomenon known as global warming. Understanding the causes behind climate change is essential to addressing its growing and dangerous consequences. Climate change is primarily driven by human activities such as greenhouse gas emissions, Deforestation, Natural disasters, and Waste mismanagement leading to severe environmental, Economic, health and social consequences.
