## Role of Democracy.

The democratic ideology is inherited in man to promote struggle, love for truth, welfare of the people rather than serving for temporary benefits. As such values are democratic ideology, so it focuses more on self decisions rather than forcing. ~~we~~ may reject all the sacred architecture where democratic ideology promotes but without the sense of faith which is the rational mean of living a good life. so Democracy is the most effective form of government for achieving desired goals.

Cohesion is missing. Use of first person is not allowed in precis.
