Conclusion

Introduction

In this modern time, new techniques and technologies have been developed. The world has become advanced and technical, which requires a smart and fresh brain. Youth in this generation are very productive with a good skills and techniques, to do this hercules task. The nations evolved with time and passing so many decades, different civilizations have been collapsed, and many had clashes. In today's world, the civilizations and nations do not fight with arms and man power which were common in the past, they are cognizant with the fact that this is a modern time, therefore, advanced tactics and methods, should be attain to survive. Different countries are economic superpowers and leading the world. The youth can play a decisive role in this modern time in nation building. It can act as driver for political change, a catalyst in economic development and main agent in bringing social change. But they are also facing some challenges like unemployment, lack of opportunities and less role in policy making. However, if they got inclusive role in policy making, provided platforms where they can share their thoughts and innovation, they can play a crucial role in nation building.
