D- Conclusion

The Essay

Imagine a world of eight billion people connected via signals; now imagine the quantity of data that would be produced daily, the icing on the cake that only few tech giants would be controlling and spying all the data for the states. Doesn't it feel like "The Big Brother" of George Orwell? This is how will the empires of future be — **The Empires of Minds**. States who would prefer and invest in technological advancements and education would shape the future course of action. The empires of the future will truly be the empires of minds only when they will produce excessive highly intellectual, technical, analytical and rational minds which will lead the empires in every sphere of lives. The futuristic and innovative states will control the information and reshape the narratives through digital propaganda and by ruling the individuals' minds. Innovative brains will formulate the states of ^{the} future through new and human friendly modes of governance and policies, integrating modern lethal technology and drones in futuristic warfares, building huge space-ships for futuristic aspirations and space dominance of empires. Hence empires producing eminent minds in abundance through effective

DATE: ___/___/___

education and policies are laying the stones to become the empires of minds who'll lead the world in every sphere from governance to space dominance.
