Balance between Urbanisation and Nature

The author says that the greenery in busy cities act as sight of relief and safe place for wild-life; keeps an equilibrium between urbanization and habitat protection. Parks are a great spot for self-reflection, interactive activities and have a huge impact on humans and environment. Eco friendly measures are needed for the conservation of wild-life and green spaces. Its a communal duty to conserve the urban greenery and build environment which smoothly blend nature with urban lifestyle making a lasting advancement.
