1) Freedom In Education In

Different Schools of Thoughts

OR

(2) Types OF
Freedom In Education ~~Is~~

On the question of 'Independency' in education there are at present main schools of rights. There are certain who says that children should be free, there are some who says they should be under authority. There are those who say they should be free despite of ~~for~~ liberty. There is also one school who believe that education should have purpose, but should provide an environment for spontaneous growth. The author does not agree with this type of school which seems individualistic. The author says that presence of large population on limited area is only possible by using sources and technique; education is must. ~~The~~ ~~men~~ ^{educators} whose success depend upon self control, their merits can are not likely ~~for~~ achieved if their methods are unchecked. Education ~~viewed~~ from social point

of view, must be a positive thing. then a chance for development. It must provide this but with mental and moral perfection.
