

~~An Investment in Knowledge~~

~~Pays the Best Interest~~

Outline

i- Introduction:

- Civilizations rise and fall not by the gold and great army, but by the depth of their knowledge.
- Thesis Statement:

An investment in knowledge pays the best interest because it empowers individuals' moral values, strengthens economies, advances science and technologies, improves governance, reduces inequality, enriches human character, ensures human welfare, and promotes societal progress.

ii- ~~Knowledge Empowers moral~~

Values of Individuals:

iii- ~~Knowledge Advances Science and Technology:~~

iv- ~~Knowledge Improves Governance:~~

v- ~~Knowledge Reduces Inequality:~~

vi- ~~Knowledge Enriches Human~~

~~Character:~~

vii- ~~Knowledge Ensures Human Welfare:~~

viii- ~~Knowledge Promotes Societal Progress:~~

ix- Conclusion:

Introduction:

~~Civilizations rise and fall not by the gold, greater wealth and powerful army, but by the depth of their knowledge.~~
~~From the ancient times to the modern world, societies have treated knowledge as their most valuable capital. In the history, nations have achieved high status, good moral standards, and economic independence through the knowledge. Because wealth can be lost, power can fade, and resources can be vanished, but the knowledge always stays, multiplies and spreads. Knowledge is the precursor of wealth, power, resources, and welfare. As the economic stability is the result of application of knowledge, power is achieved through modern warfare and technology, which can only be achieved through knowledge, resources are useless if not used properly and knowledge teaches the appropriate use and discovery of natural resources.~~
~~On the other hand knowledge is~~ **do not use not**

DATE - 1/1

directly proportional to ~~science and~~ ^{human welfare} technology because the modern technology, medicines, ~~human treatment~~ machines, diagnostic tools of diseases, social media, transport vehicles, and airplanes are all the ~~inventions~~ of ~~knowledge~~. A nation will lead to destruction if it ignores the importance of ~~knowledge~~. An investment in ~~knowledge~~ pays the best interest because it empowers individuals' moral values, strengthens economies, advances science and technology, improves governance, reduces inequality, enriches human character, ensures ~~human welfare~~, and promotes social progress.
