Climate Change: Causes And Consequences

Introductory Paragraph;

Avoid cutting
Avoid spelling mistakes
Must write this statement in your introduction paragraph

When nature rebels, no nation; big or small can
hike from its wrath from melting glaciers to
Scorching heatwaves, climate change has transformed
into most alarming environmental threat ~~for~~ of the
21st century. Once the climate change viewed as a
gradual phenomenon, climate change has now become a
fast escalating crisis intensified by human industrial growth,
rampant deforestation and unsustainable pattern of
consumption. Climate change impacts are no longer
confined in ~~research~~ scientific research or warning,
as they are visible in flooded streets of big cities,
dried rivers ~~and~~ and ruined crops. Although, it is worldwide
issue but countries like Pakistan, despite ~~for~~ their
~~minimal~~ contribution to global emissions are more
affected by climate change & bear severe consequences
of climate change. Therefore climate change, driven
largely by human activities, has emerged as a global
disaster causing environmental degradation, economic
disruption ~~and~~ and social distress with vulnerable
nations like Pakistan experiencing disproportionate
effects and highlighting the urgent need of action
taken by International institutes or organization. So
that nations like Pakistan, which are badly affected by
consequences of climate change can overcome from
~~most~~ the disasters of climate change.
