

Climate politics : a hurdle to climate control

* Outline

1) Introduction

2) How Climate Politics a hurdle to Climate Control

2a) Lack of binding enforcement under Paris agreement

2b) Fossil fuel lobby influencing in Climate Policies

2c) Carbon emission countries continue to rise carbon

2d) Insufficient budget to convert into climate resist infrastructure.

2e) National economics interest comes in between Climate policies.

2f) Converting green land into housing societies

2g) Slow progress to implement the renewable energy project.

2h) Weak institutional Capacity

2i) Weak Governance and Policy inconsistency

3) Solutions to Control the Climate Change.

3a) Strengthen Global Climate Governance

3b) Implement Global emission Target

3c) Increase the Global Climate funds

3d) Shift to energy mode into renewable energy

3e) Strengthen the national Climate institution

3f) Implement the Climate smart Agriculture

3g) Give education about Climate in educational institutions

3h) Start the campaign to increase the forestation

3i) Political Stability for long term Climate Policy continuity.

4) Conclusion

vague

Developed Countries are the cause of Climate Change but other under developing countries ^{are} facing the results. Few countries adding the huge share of Carbon emission but vulnerability are facing by Pakistan, Bangladesh and other weak countries. And developing

countries share of Carbon is minimal. The United States is sharing the huge number of Carbon but not fully participating in global Climate policies. It's participating dependent on politics, when government change its policy about Climate Change accordingly.

participation
is dependent
on politics

The another influencing factor is fossil fuel producing lobby that affecting on Climate policies. Furthermore, the sharing of Climate funds are insufficient to build the climate resist infrastructure.

~~Here, developed countries need to prioritize the Climate policies and give the funds to vulnerable countries to make climate resist infrastructure and cover the finance gap.~~

~~Let's converge the whole debate, politics on Climate nationally and globally is making the developing countries more vulnerable.~~

~~This is the time to need the integration on national and global level to counter the Climate Change and save the future of our upcoming Generation.~~
