→ Translation:

Ramanujan was ~~also~~ a British-Indian mathematician, whose

- work is still being used in space technology today. Unfavourable circumstances during childhood, and maths being his only interest, he could not get into college. At last, a British professor Hardy helped him to get into Cambridge, where he was awarded a degree in B.A. He invented the digits 2520. The property of these digits are they are divisible by numbers from one to nine. Ramanujan was vegetarian.

Due to poor diet in Britain he died in 1920, when he was merely 32 years old. A feature film has already been made on him in India.
