

Artificial Intelligence

Will Take Over

Human Intelligence

1 - Introduction

2 - Factors which show that artificial intelligence will take over human intelligence:

a) - Modernization of the World

b) - Overliance on AI due to the fear of defeat

c) - Desire for efficiency and more productivity

Date _____ Day _____

d) - Feeling of insecurity

e) - Early diagnose of diseases

f) - Smart decision making

g) - Development in armed equipments

3- Reasons which depict artificial intelligence will never take over human intelligence:

a) - Inability of AI to understand the purpose

b) - Incompetence of critical thinking

Date _____ Day _____

c)- Emotionless drive

4)- Impacts of AI over human intelligence:

a)- Surge in competition

b)- Rampant biasness

c)- Uncontrolled rising trend of hegemony

5)- Pragmatic measures to control the dire repercussions of AI over human intelligence:

a)- Boosting the progressive tendency of AI

b)- Preferring humans over technology

Date _____

Day _____

6) - Conclusion

Date: _____

Day: _____

In the 21st century, the world has witnessed rapid technological advancement, especially in the pursuit of artificial intelligence (AI). This progress has some positive and negative impacts on humans. Astonishingly, the surge in the use of AI depicts that it would overwhelm the human conscience in the coming years. There are various manifestations which support the above-mentioned argument. Those personifications are as the modernization of the world, desire for efficiency and more productivity, and the development in armed equipments. Comparatively, it is not easy for AI to conquest the human cognition. There are some reasons which prove that overwhelming the most knowledge creation of the

God-humans is a difficult task for AI. These factors are the inability of AI to understand the purpose, and the emotionless drive of AI. Additionally, the success of AI would pose grave impacts. Those repercussions are unfettered competition and the uncontrolled rising trend of hegemony. Moreover, these sobering effects can be reduced by adopting some pertinent steps like preferring humans over the technology. Thus, AI will take over human intelligence after facing some difficulties, however, its vanquish will pose severe effects on human, which can be reduced by taking some pertinent steps.
