Conclusion

There was a time when world received limited and biased news, modern day media exposed the humanitarian violence to each and every individual.

This chain of biasness has broken when media got liberalized around the world. over the time, media played prominent role in the development of social, cultural, and humanitarian activities.

Today the world is seeing worst humanitarian crisis in Israel-Palestine war. Media remains the only mode of communication to the besieged enclave. where the oppressor has banned the media coverage, social media is still unstoppable and exposing the on ground realities. Historically genocides - like in Rwanda and Bosnia - was not infomant of common people, but the Palestine's ground realities are open to each and every individual. media: has exposed Israel's war crimes, ~~in the~~ it unites the world against Israel on the basis of humanitarian gesture, and it remains the only mode of communication when Palestine is facing complete territorial siege. Media gained unprecedented success as common individual in the latest American survey

says that Israel is committing genocide. western bloc and most importantly united Kingdom that presented balfour declaration, are pulling their feet back. The UK has recognized palestinian state after a century of balfour declaration is only because of the power of social media that creates immense pressure on the UK internally. The media is succeeded as it broken the precedents of war and challenges the oppressor state to protect humanity. The essay would discuss the current status media, the role which media has played so far, and its achievements in the israel - palestine war.
