

Precis-2024

In urban areas, green spaces like Parks offer ~~a~~^a respite from the busy life of the city. City parks provide a wide range of prospects, such as making community bonds stronger and offering mental peace amid the busy city life. They bring people together from diverse backgrounds for various activities like family gatherings, sports, and concerts. Moreover, they also play a role in improving environmental conditions. The challenges in maintaining a balance between growing urbanization and preservation of ecological landscape can be achieved by promoting sustainable urbanization like planting and preserving green spaces.
