

UNIVERSAL HUMAN EQUALITY IS

UTOPIA

— x x x —

OUTLINE

I. Introduction

- a. Hook
- b. General Statements
- c. Thesis statement.

II. Why Universal Human Equality is becoming Utopia:

1. Lack of education and awareness are the bottlenecks for Universal human equality
2. International Human Rights Organisation failed to enlighten the concept of human equality at the grassroots levels.
3. Political and bureaucratic unwillingness to achieve human equality for their personal interests.
4. Presence of demagogue in the societies
5. Violation of human rights by influential forces
6. Women have not achieved their basic rights completely and its true spirit.

7. Impoverished communities are still being deprived of basic necessities
8. Unacceptance of Third gender
9. Concepts of untouchables and Scheduled class system still exist in the countries
10. Socio-cultural norms and ~~se~~ misinterpreting religious teachings ^{are} being hindrances of acquiring human equality
11. Developed nations dominating the underprivileged and less-developed economies
12. Concept of "majority has authority" still prevails in the countries.
13. Lust of retaining and maintaining power and authority
14. Ineffective law and enforcement agencies failed to ~~create~~ implement human equality

III. Remedial measures and Approaches to ensure that Human equality is not Utopic.

1. adopting ~~Ensuring~~ Human Rights ^{Seamlessly} ~~stream~~ adopted and religiously followed

2. Edify the masses at the basic level, through campaign, advertisements and education.
3. Accountability and transparency against the violation of human rights.

IV Conclusion

From the French Revolution to modern gender, racial and global economic divides, history proves that universal human equality remain utopic. It is but limited in practice by class, culture and power structure. "Liberty, Equality and Fraternity" were the slogans that were chanted in the French Revolution in 1789. After almost 200 years, equality is not achieved neither class differences is eliminated. This depicts absolute human equality is ~~is~~ unattainable. With the passage of time, human inequalities are further widen in the societies. Some regions of the world is dominated by ~~Patriarchal~~ Patriarchal mindsets. Whereas, other side of the globe is ruled on the basis of racial thinking. This thinking, later on, led to "Black Lives Matter." Economic and political turbulence, chaos and uproar prevail because of ^{such} ~~the~~ human inequalities. Movements, protests and campaigns created an environment of fuzzy and uncertainty in the economies. Economies growth becomes slowdown, creating

supply shortage in the market, ~~at~~ that causes inflation that further put burden on the fragile and vulnerable economies. Addressing human equality is fundamentally important to avoid ^{inequality-based dilemmas} ~~such~~ issues. Therefore, this essay ~~will~~ could shed some light on the reasons why Universal Human equality is utopic and provide ~~some~~ few pragmatic solutions and approaches to reduce the inequalities in any economies in particular and from the world in general so that Universal human equality is not ~~but~~ utopic.

To begin with, paucity of and inferior quality standards of education have created bottlenecks of for Universal human Equality. Education gives awareness to the people after which humans can make informed decision in their life. Literate people always ensure his or her rights ^{are} ~~and~~ protected and they also know ways to avail those basic rights. In the developed nation, where illiteracy rate ^{is} extremely low, ~~the~~ ~~citizen~~ in comparison to the underdeveloped and ~~less underdeveloped~~ developed countries have higher illiteracy rate. According to editorial experts, countries like Pakistan, Afghanistan and other African countries have poor quality standard of education. Dropout remains high. When children are out of school, ~~then~~ they do not know to read ^{and} ~~write~~. Afterwards, ~~there~~ ^{are} left behind from the world and making Universal human equality utopic.

International Human Rights organisations have failed to enlighten the concept of human equality at the grassroot level of the societies. Is the second most convincing ground why the universal human equality is becoming utopic. People in Democratic Republic of Congo are dying from life-taking disease that is aggravated by ^{raw material export} ~~export~~ cobalt. extraction of ~~cobalt~~ that is used in batteries of Electric vehicle (EVs). There ~~is no~~ ^{being} are ↑ marginalised from the basic necessities of life such food, pure water and medical drugs. The question arises ~~why~~ that why international human rights to not take stern action against people of Congo? ~~Where~~ are the human right activities? Not addressing marginalised people and nations like Congo are the fundamental reason why universal human right is ~~a~~ utopic.

The Third reason for which universal human equality is utopic is because of political and bureaucratic unwillingness to achieve equality in the country. It is due to when humans have equal chances regardless of ethnic group, religion and class status. Political leaders and bureaucrats feel threat from the people. They consider giving equal right means they are accountable to masses, ~~and~~ And also fear that people might replace them with other political leader or bureaucrat and this gives an external threat to their power and authority for which they do not prefer to devolve human equality rights and surely making universal human equality, an utopic.

What is the fourth barricade which is creating a cogent cause in Universal human equality? And that is presence of demagogue in the societies. These demagogues ensure that humans ~~do~~ not have equal rights so that rights-deprived people and communities continuously fight with each other. Demagogues have faith that everyone is equal in the society then there are high chances that those people give enough time to the demagogue which can dilute power and authority influence from the society. To control their power and dominance in the society, demagogues ensure that Universal human equality is utopic.

Violation of human rights by influential forces is ~~the~~ ^{the} fifth instigator ~~for~~ which Universal human equality is utopic. Influential forces such as the USA dominance in the Afghanistan from 2001 to 2021 violated all human rights of Afghan people. As while, USA was labelling that USA and NATO forces are dismantling terrorism from the ~~region~~ Afghan soils. But unfortunately, ~~every~~ right for freedom, access to basic necessities and education and right to safe environment were violated ~~from~~ ^{by} the USA forces in the name of targeting terrorism. Moreover, Israel, another influential force, that has been doing genocide and ethnic cleansing in Gaza, and also bombed multiple ^{other} countries in the Middle East ~~damaging~~ breaching their sovereignty is another influential force that has violated human rights. Clearly making Universal human equality ~~utopic~~ utopic.

The sixth reason to be why universal human equality is utopic is because of women have not achieved their basic rights completely and its true spirit. From Magna Carta in 1215 to Universal Declaration of Human Rights in 1948 and its further development in the later stage depicts the women were always sidelined by the state. So much so, that countless women in remote areas of Pakistan do not know about their basic right. If any woman dare to speak about her basic fundamental right, she is brutally treated and tortured by her own family members. Due to which ~~women~~ women do not take part in economic activities neither acquire education. However, once western philosopher Aristotle mentioned that "the roots of education are bitter but its ^{results} ~~profits~~ are fruitful." Magnitudinally ~~women~~ women in the remote area widens the gap of human equality. Thus, make a universal human equality is not a utopic a chaotic the society.

Improvised communities are still being deprived of basic needs is the seventh ^{ground} ~~reason~~ ground of universal human equality is utopic. Around 60 per cent of population in India lives under poverty line and in slum areas, 44% of population of Pakistan survives below poverty line. These deprived people do not have access of safe drinking water, clothes and food. When such a large ~~proportion~~ proportion of masses are deprived from such necessities then how they can ~~require~~ achieve human equality. Hence, making universal human equality utopic.

Eightly, Unacceptance of third gender in the 21st century is also the universal human inequality. Innumerable countries do not provide proper status of human being to the third gender. This targeted community ~~are~~ is not allowed to ~~create~~ ^{have} their legal birth documents due to which they are unable to contribute in the any activity. Third gender is badly treated and discriminate ~~to~~ ~~the~~ in the world specially in the developing economies, making their survival next to impossible. This ~~raises~~ ^{aggravate} crime rates like ~~harassment~~ harassment, abuse and other criminal activities in the society. They are deprived from job opportunities, and education and other basic rights. Thus, making universal human inequality even after a lot of ~~sacrifices~~ sacrifices.

Prevalence and existence of ~~untouchables~~ untouchables and scheduled class is the ninth universal human inequality. Scheduled class group dates date goes back to rise of Buddhism. That divided the society into ~~two~~ ^{two} segments like Priest, ~~prophet~~ and scheduled class. These scheduled were ~~consider~~ people who lived below poverty line and were working in cleaning sector of the area. Thus, later on the difference between scheduled class and priest further aggravated. That is ~~is~~ can be observed currently in the India. Scheduled persons are still treated differently and elite class does not like to touch or meet with them. Therefore, question rises how universal human equality be ~~be~~ obtained.

Furthermore, socio-cultural norms and misinterpreting religious teachings are being hindrances of acquiring human equality. Innumerable people believe if their are poor, then their prefer to be poor thought their life, having believe that they will have better life in the forthcoming life. For this reason, chunk of people do not strive to workhard in their life. These flawed beliefs are set by socio-cultural norms, and to some extent misinterpreting of religious teachings. Thus Ergo, such believe by masses is the reason of universal human equality.

In addition to this, Developed nations dominates the underprivileged and underserved economies. Western world often overrides the powers and violate damage hurt their economies by exploitation of rare minerals, resources and repatriation ^{of} profits to their countries. For which there no investment is done in the exploited and damaged economies. For example, investment ^{of} goldsmith American-based company in the Reco Dig, Balochistan, takes 50% of profit over the extraction of resources. and this half share of profit is fly to the USA to its parent company. Doing no expenditure in protecting environment, and paying bonus to the labourers. is the so are the reasons how developed nations exploit underdeveloped countries. then how the human ^{countries} equality be achieved.

Majority has authority still present in the every part of the ~~economy~~ world. Whether it is contesting an election or operating a business venture. Political parties win election ~~with~~ with majority. Later on ~~that~~ hurts the loser party. Same is the ^{case} ~~same~~ ~~with~~ in business ~~sectors~~ and other sectors as well. Big giants run the business and creates monopoly in the economy making it impossible for small enterpreneur ~~next~~ to survive. Other more ~~ex~~ examples can be witnessed in the country where majority control the minorities, creating a rift in the human inequality.

Lust of retaining and maintaining power and authority ^{are is} ~~is~~ the thirteen reason of universal human equality is utopic. One in power does not want to either devolve the power to the lower tier of the society or wanted to retain just for the sake of prestigious status. Plethora of people loves to have influential control over others, ~~to~~ creating hindrance to acquire human equality. They treat ~~has~~ other people as a slave in their society rather than humans. Humans are mistreated by the power-holder and naive people never dare to speak against those influential person. It is because of fear of death. Thus, upper class and lower class ^{prevent} ~~continuous~~ in the society from ~~a~~ decades, just because of power reformation at the hands of few. Then ~~how~~ ^{making}

Universal human utopia.

lastly, ineffective laws and enforcement agencies have failed to ~~correctly~~ implement human equality. Aristotle once mentions, "with it best, man is noble of all the animals, without law and justice it is worst." This statement highlights the importance of law and justice in ~~the~~ any society. But unfortunately, barrel of laws are ineffective due to delay in justice system and overload work in the court. Due to which human basic right remain violated by other person. And this inequality of human universal equality further araised.

Previous paragraphs highlighted the reasons of why Universal human equality is utopic. ~~Success~~ ~~Success~~ coming paragraphs would underscore the remedial measures and approaches to ensure that human equality is not utopic.

Firstly, adopting human rights seamlessly and religiously followed is one of the way out to ensure human equality. This can be done through International as well as national cooperation. At global level, United Nations of Human Right Commission must ensure that human rights are not violated. A person or ~~a~~ country must be punished and penalised ~~heavily~~ heavily in case of hurting another person. UNHR must ~~do~~ ^{perform} audit the ~~and~~ and personally visit the place that where violation

rate is high. Whereas, at domestic level, governmental institutions need to take stern actions against the shenanigans of human rights. This way, human equality can be achieved.

Secondly, eradicating the masses at the basic level through campaigns, advertisements and making primary education compulsory for the children. This ~~is~~ is the ~~one~~ another ~~route~~ to achieve universal human equality. State needs to make sure that each children must get primary education. With primary education, children will be able to get ^{their} basic human rights. That could reduce the gap between rich-poor disparity and human equality can be obtained.

Thirdly, accountability and transparency against the violation of human rights is the last way forward toward human equality. When a person who creates human inequality must be penalized. Even an organisation where human equality prevails should redevise their policies to ensure human equality and remove all discrimination-based policies. ^{Regulatory} ~~Regulatory~~ body must be established to keep ~~a~~ vigilant eye on the human equality. Thus, it will provide shield to human equality.

To cap it all, with human equality nations and countries ^{can} progress collectively. Economic can flourish, political stability can be achieved,

Date: _____

everyone would have platform equal chance of freedom. Human equality brings with intellect and wisdom within a person. In order to obtain universal human equality, basic education must be given, all the hurdles and obstacles must be removed from the way. Unfortunately, in the 21st century, regardless of basic education, access to social media and human's sense, one can easily observed human inequality ~~from~~ in one's surrounding. Thus, making human equality utopic. Therefore, ~~this~~ ^{why} this essay shed light ~~on~~ on reason detre of human equality is utopic and highlighted some effective remedial measures to eliminate the human inequality.
