ROLE OF TECHNOLOGY IN Modern Education

Technology has played a significant role in the modern education after the COVID-19. The advantages of technology is immense compared to the disadvantages. It has introduced the online learning platform. It shifted the traditional teaching method to transformative teaching with the use of technology. The use of AI has enriched students with informative knowledge. It has given students access to e-libraries, books, policy briefs, journals etc. It facilitates the students to do remote jobs or free-lancing. On the other hand it's excessive use lead to the deterioration of mental health issues. The use of AI diminishes cognitive abilities. It has threat of Cyber Crime which invades privacy. Therefore, the role of technology in modern education has immense advantages as compared to disadvantages.
