Question = 2

Precis:

Renewable energy, has been glorified as an antidote for old fashioned carbon emission technologies. Yet it is damaging the planet in different way. The new carbon free emission technologies requires rare-minerals extracted from earth generate more pollution. even though large amount of Agricultural countries became barren due to runoff chemicals. Moreover, new auto-mobines batteries emits more (CO_2) than old manufactured ones. These new items quickly expires and have no proper recycling or degradation process - such as turbine fans, solar pannels which then ultimately depends on fossil-fuel for further operations. Further, the "Green labels" is mere become business rather to provide

to provide honest awareness. The true environmental sustainability demands restraint, efficiency and systematic humility. Unlike another industrial revolution - the planet is merely wounded by renewable energy not healed.

Translation :

If any of urdu professor claims that thoroughly understands Ghalib's poetry. And he can explain / interpret his poetic tectics fluently, indeed he is on the peak peak of ~~the~~ his understanding. But if a request is made to read poetry like Ghalib. He will hold his tongue. Because ideas and creativity are two different things. Ideas are is the construct of brain, whereas creativity is the result of divinity. The fame of Ghalib was not only depended on studies or hardwork but it was his level of intellectual sense and power of divinity. This is the reason; that his poetry is still alive in hearts, after

centuries, as it was in his era.
