Introduction:-

Knowledge is the light that shows us the right path in life. It removes the darkness of ignorance and brings understanding. In addition, people grow wiser and societies become stronger through knowledge. Every success begins with learning something new. Indeed, knowledge is the key that opens every closed door. An investment in knowledge encourages people to enhance their individual personality and promote social cooperation. It also provides information about citizen's laws and rights, which develops awareness about political participation. Moreover, knowledge creates employment opportunities by developing technical and professional skills that attract foreign investment. It also ensures sustainable growth and helps people to understand the global perspectives. However, few challenges exist in investing knowledge, as most of the people do not have access to professional education due to a lack of political priority. To counter the challenges, we need to promote awareness and also ensure accountability in the education sector. In fact, knowledge greatly contributes to personal and nation's growth. It offers a high return in political, economic and social spheres. Although citizens face various challenges in acquiring knowledge, therefore, certain measures are required to address these challenges.

Conclusions:-

Knowledge highly participates in personal development and national growth. It yield a higher return in every area/sphere of life. Many people face problems, but certain measures are required to overcome the problems. Indeed, knowledge enhance personality, encourage social cooperation, and also provides awareness about citizen's rights and politician. It facilitates employment and skills by attracting foreign investment. In addition, it ensures sustainable growth and understand the global perspective. Although most of the people face problems due to a lack of access and low priority by politician. Despite these problems, some measures are needed such as awareness and accountability. Therefore, knowledge is very helpful to all the people and provide benefits in life. We should acquire knowledge to achieve success in life, understand global perspective, and can take better steps in difficult situation.
