According to UN report, 7.6 million people in Pakistan are drug abusers - a tragedy that reflects a deeper crisis in society. This drug use crisis converts itself into growing public health crisis, a more concerning issue of the world. Drug markets are exploiting

pandemic-induced economic downturn to increase the illegal drug cultivation/illicit cultivation. Drug use refers not only consumption of illegal substances but also includes the misuse of ~~illegally~~ prescribed medications. The increase in drug ~~production~~ and use in modern times is a serious public health threat driven by social pressure, mental health issues & lack of education and it demands immediate action. This essay will explore the drug market's increasing ways, causes and consequences of this growing problem.
